

Hospitalsdonationer givet af Novartis Healthcare A/S

Navn på aktivitet/projekt/udstyr/enhed, som donation støtter	Patient-driven symptom registration in the Journal app for breast cancer patients
Navn(e) på hospitalet/afdelingen eller lignende, som håndterer aktiviteten, projektet, udstyret eller enheden	Aarhus University Hospital, Department of Plastic and Breast Surgery / DCCL Steering Group
Type aktivitet/projekt/udstyr/enhed, som donationen ydes til	Development and implementation of a digital symptom-registration function in a mobile application, including implementation research
Formålet med aktiviteten/projektet/udstyret/enheden, som donationen gives til	The project will develop and implement a patient-driven symptom-registration function in the Journal app. The function will enable breast cancer patients to continuously record symptoms, side effects, discomfort and late effects in a simple, intuitive and structured digital format. Its purpose is to strengthen patient self-management, provide a personal overview and improve the basis for dialogue with healthcare professionals at relevant contact points.
Tidshorisont (hvis muligt)	1 September 2026 to January 2027
Den finansielle bevillingsstørrelse	DKK 150,000 excluding VAT
Naturaliers omfang, indhold og anslåede værdi	During the project, input will be collected from clinicians and breast cancer patients. The recipient may also invite Novartis to occasional virtual or in-person project dialogue meetings to receive high-level project updates and provide non-binding input. Novartis input will be advisory only, and the recipient retains full and independent responsibility for the project.
