What is the invoice rejection _ treat?

Invoices are reviewed by our processing team to verify compliance with Novartis-defined billing guidelines, and based on this review, the invoice may be rejected for the previously stated reasons.

A notification is sent to the supplier via e-mail stating that the invoice has been rejected due to one of the reasons mentioned, with a request to correct the invoice and resend it for processing/payment.

When a new, correct invoice is received, it is posted and paid according to the due date. The payment terms are calculated on the basis of the invoice receipt date at the Novartis mailroom.

How Ariba Network works

We are committed to ensuring that we not only provide timely and efficient payment processing for goods and services to all of our suppliers, but that we do this while supporting our pursuit of environmental sustainability through the adoption of e-solutions.

What is Ariba Network?

- It is exchange and storage of legally valid PO invoices between trading partners in electronic format _ only.
- - invoices have legal validity and can be used to prove compliance or as tax originals (the interface does not use or require paper-based invoices).
- The e-invoice is delivered to Novartis as an image and a data file, ensuring a fully automated end-to-end process.

Note: For the above reasons, a PDF copy of the invoice is not considered a genuine " electronic invoice".

What are the main advantages of Ariba Network resolution?

The Ariba network enables electronic PO and invoice transmission.

The purchase orders are sent by Novartis to the supplier and the invoices are transferred by the supplier to Novartis through the Ariba Network. The invoices are transferred to Novartis accounting systems, where they are processed and posted.

- *Less risk of late payment thanks to immediate invoice delivery*
- *High on-time payment by reducing invoice processing time*
- *Full visibility of orders, invoices and payment status*
- *Fully compatible electronic invoices that can be used as tax originals*
- *Invoice delivery is guaranteed and confirmed, providing full visibility as part of an end-to-end process*
- *Removal of invoice exceptions and supplier inquiries*
- *Elimination of costs associated with processing paper invoices (stamps, envelopes, printing)*
- *Environmentally friendly*
- *Invoice data is archived digitally , which saves time and space*
- *Option to use the same e-invoicing solution across several Novartis units*
